

# GEMINI

Bunk bed

This base is made with high-quality materials and components, giving it excellent resistance and durability.

Flexible surface composed of **14 individual beechwood slats**. Made with **laminated wood** and curved with a steaming process, they retain elasticity over time. Laminated wood is in line with EU directives on consumer health. Slats are fitted in the frame with shock-proof resin components. **Thickened moulded steel frame**. All metal components are covered with nontoxic and scratch-resistant paint. Equipped with ladder and fall prevention rail.

It can be transformed into two single beds or a double bed.
