

# STANDARD LATEX

HEAD ZONE	SHOULDER ZONE	LOWER BACK ZONE	HIP ZONE	THIGH ZONE	CALF ZONE	FOOT ZONE
Particularly elastic area, capable of providing the correct support to the head.	Area provided with widened pinholes and softer surface, able to effectively accommodate the shoulder and avoid blood circulation issues.	Supporting and elastic area, capable of sustaining the lower back.	Balanced hip accommodation is made possible by the tighter pinhole surface pattern.	Elastic and supporting area, capable of sustaining the body.	Relatively soft area, designed to support calves without compressing them.	Elastic contact point for the feet.

The differing firmness levels on either side of pure la-tex result in two comfort levels: soft and medium-soft (bi-comfort).
