

# AQUAPURE KID

The differing firmness levels on either side of **Aquapure®** result in two comfort levels: soft and medium-soft (bi-comfort).

Exclusive structure with varying comfort zones: greater support in the centre to sustain the heaviest part of the child's body; softer towards the two ends, to improve comfort when sleeping on the side. Smartly distributed and sized pinholes, together with **Aquapure®** extraordinary breathability, help to prevent accidental suffocation. They also facilitate air flow inside the mattress.
