

MINI-BONNELL SPRINGS AND AQUAPURE SOYA

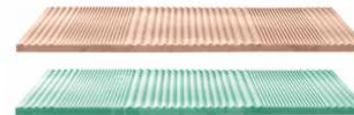

| HEAD ZONE | SHOULDER ZONE | LOWER BACK ZONE | HIP ZONE | THIGH ZONE | CALF ZONE | FOOT ZONE |
|--|---------------|-----------------|----------|---|-----------|-----------|
| <p>The best models in the Somnium orthopaedic collection use almost twice the number of coils used in standard spring mattresses: 300 for the single mattress ⁽¹⁾ and 600 for the double mattress ⁽²⁾. The progressive adaptation of the springs, together with the increased support provided by their number, guarantees the benefits of firm support to the back and an anatomically correct posture.</p> | | | | <p>The mattress supports the different weights of the body (back, hips, legs) in a balanced way, regardless of the total weight of the user. The density of the suspensions and their relatively small size is the result of an effort to increase density, which prevents wear of the insulating materials and paddings, extending the mattress life and significantly increasing comfort.</p> | | |
| | | | | <p>⁽¹⁾ cm 85 x 190 ⁽²⁾ cm 165 x 190</p> | | |

The differing firmness levels of **Aquapure® Soya** elements on either side of the mattress result in two comfort levels: medium-firm and firm (bi-comfort).

The exclusive **Aquapure® Soya** wave surface in seven variable patterns significantly increases comfort of the whole body. The empty spaces between coils, together with the shape of **Aquapure® Soya**, facilitate air flow inside the mattress.

**AQUAPURE®
SOYA**

The **Aquapure® Soya** elements, with varying firmness, with the exclusive wave surface with seven variable patterns provides proper support for the entire body.
