

ELASTOCELL AND MEMORY STD WITH COMFORT ZONES

The differing firmness levels on either side of the structure, in combination with **Memory std®**, result in two comfort levels: soft and medium-soft (bi-comfort).

The exclusive **Memory std®** surface with variable pinhole patterns significantly increases comfort for the whole body. **Memory std®** pinholes facilitate air flow inside the mattress.

The **Memory std®** element with the exclusive pinhole surface with seven variable patterns provides proper support for the entire body.

Memory std® is an innovative viscoelastic foam.
